(54) ELECTRICALLY CONDUCTIVE RESIN COMPOSITION

(57)Abstract:

PURPOSE: To provide a resin composition highly excellent in electrical conductivity while retaining excellent characteristics inherent in the polyester resin.

CONSTITUTION: The resin composition highly excellent in electrical conductivity can be obtained, without impairing excellent characteristics inherent in the polyester resin, by incorporating (A) an aromatic thermoplastic polyester resin with (B) a small amount of specific electrically conductive carbon black(CB). Among others, CB $\geq 350\text{ml}/100\text{g}$ in dibutyl phthalate oil absorption heightens the electrical conductivity of the composition.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]
